

Introduction

The MM-CP15 is the 15" single pole for multi-monitor mounts with clamping base. The MM-CP28 is the 28" version, and the MM-CP42 is the 42" version. These three different pole sizes provide more mounting options for those installing multi-monitor mounts. The larger the pole, the more displays that can be mounted per single base. Clamp installations are versatile and attach to desks, cubicles or any standard tabletop.

Parts List

Step 1

Multi-monitor mounts with clamping bases easily secure to a variety of flat surfaces including desks, cubicles, or any standard tabletop.

- ?** First, determine where you would like your multi-monitor mount positioned on your desired surface. The mounting surface should be capable of supporting 5x the weight of the flat-panel and mount. (Mount & flat-panel sold separately)

Determine your surface thickness, the clamping base is adjustable from 1" to a maximum of 4".

- To adjust to desired size, remove the pre-installed 3/8" x 1/2" button head screws with a 6mm allen key (shown in figure 1 to the right)
- Reposition them by moving the existing screw holes on the bottom portion of base so that they are aligned with one of the 3 pairs of holes in the back bottom portion.
- Re-install the 3/8" x 1/2" button head screws through the the back portion and bottom piece so that the pole and clamp are secure.

Step 2

- Once the clamp base's opening is large enough to easily fit onto your desired surface, slide the base onto the surface.
- The top portion with the pole size you have chose is positioned above the surface, and the bottom portion with the tightening screw nobs are below the surface.
- Twist the screw nobs (one at a time) so that they are firmly gripping the bottom of of the table and the top of the base is pressing firmly on the upper surface (see figure 2 below).

PREMIER MOUNTS

LIMITED LIFETIME WARRANTY

What and Who is Covered by this Limited Warranty and for How Long

Premier Mounts warrants this product to be free from defects in material and workmanship for the lifetime of the original owner of this product. The limited warranty is valid only for the original purchaser of the product.

What Premier Mounts Will Do

At the sole option of Premier Mounts, Premier Mounts will repair or replace any product or product part that is defective. If Premier Mounts chooses to replace a defective product or part, a replacement product or part will be shipped to you at no charge, but you must pay any labor costs.

What is Not Covered; Limitations

PREMIER MOUNTS DISCLAIMS ANY LIABILITY FOR DAMAGE TO MOUNTS, ADAPTERS, DISPLAYS, PROJECTORS, OTHER PROPERTY, OR PERSONAL INJURY RESULTING, IN WHOLE OR IN PART, FROM IMPROPER INSTALLATION, MODIFICATION, USE OR MISUSE OF ITS PRODUCTS. PREMIER MOUNTS DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. PREMIER MOUNTS IS NOT RESPONSIBLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING BUT NOT LIMITED TO, INABILITY TO USE ITS PRODUCTS OR LABOR COSTS FOR REMOVING AND REPLACING DEFECTIVE PRODUCTS OR PARTS. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

What Customers Must Do for Limited Warranty Service

If you discover a problem that you think may be covered by the warranty you MUST REPORT it in writing to the address below within thirty (30) days. Proof of purchase (an original sales receipt) from the original consumer purchaser must accompany all warranty claims. Warranty claims must also include a description of the problem, the purchaser's name, address, and telephone number. General inquiries can be addressed to Premier Mounts Customer Service at 1-800-368-9700. Warranty claims will not be accepted over the phone or by fax.

How State Law Applies

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE.

Introduction

The MM-CB2 is a dual multimonitor mount arm that works with any 2" tubing. Each mounting head provides 90° of omnidirectional tilt. The mounting heads include both 75x75mm and 100x100mm VESA mounting patterns. The arm includes integrated cable management tabs to keep wires and cables protected and organized. The mounting heads can be horizontally adjusted.

Step 1

- Slide your mounting arm over the pole and base (Figure 1) (not included, but should be previously installed).
-  Determine the position on the pole desired for your mounting arm.
- Once in desired position, tighten the two (2) pre-installed M8 x 6mm set screws in the holes in the back of the MM-CB2. Tighten with included allen key (Figure 2).

Step 2

 Are you installing to a 75x75mm or 100x100mm VESA mounting pattern?

For 75x75mm, use mounting points A. For 100x100mm use points B in figure 3.

- Thread the M4 screws to one-half of their length into the top two mounting holes on each display, but do not tighten the M4 screws at this time.

Parts List

Step 3

- Insert the heads of the M4 screws through the keyhole slots on the mounting head (Figure 5).
- Insert the remaining two (2) M4x10mm screws, into the bottom mounting points (Figure 4)
- Repeat sub-steps 1 & 2 for the second display.
-  Tighten all M4 screws. Do not overtighten the mounting hardware

Step 4

To adjust the position of your displays horizontally

- Turn the mounting head adjustment knob counter clockwise until the mounting head is loose enough to slide easily along the pole.
- Slide the display (or mounting head) to the desired position.
- When in place, turn the adjustment head clockwise to tighten it. Make sure it is completely secure and does not move before you move on to the next display or finish.
- Repeat steps for other displays if desired.

Installation Instructions

Step 4

To adjust the tension and/or tilt angle of the mounting head:

- 1) Adjust the mounting head by utilizing the 90° continuous tilt, until it is in the desired position.
- 2) Remove the side and bottom cosmetic cap from the mounting head (Figure 6)
- 3) Use the supplied socket wrench to tighten both nuts.
- 4) The side nut secures the tilt position (Point A), while the bottom nut secures the pivot (Point B).

Do not overtighten the mounting hardware
